# Spence Corrosion Services Ltd

# SPENCE CORROSION SERVICES LTD

Spence Corrosion Services Ltd. is focused on combining safety and technology to maximize asset and business performance. They are industry leaders in the corrosion protection of tanks, vessels, and piping for the Oil and Gas, Mining, Petrochemical, Nuclear, and Fertilizer markets in Canada.

At Spence Corrosion Services Ltd., they value informing organizations about the best advancements in corrosion protection while creating quality solutions for asset management. They are committed to safety, decreasing costs, asset down time, and meeting project deadlines. Simply put, Spence Corrosion Services Ltd. creates the standard for industry quality and innovation.

# Services

## Robotics for Confined Spaces

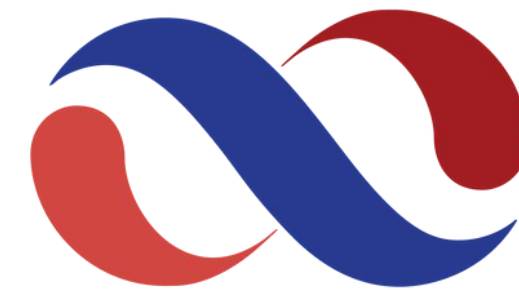

Spence offers robotic services that include:

- Abrasive blasting
- Vacuuming
- Interior and exterior coating
- Inspections
- Robot technology improves safety and quality. Robots reduce project costs and increasing efficiency.

## Abrasive Blasting

Using our extensive knowledge and experience in abrasive blasting, we ensure:

- The right surface profile and cleanliness is achieved
- The highest bond strengths in new coatings and linings
- Optimum blast media for the project
- The use of the right equipment and pressures

# Services

## Water Jetting

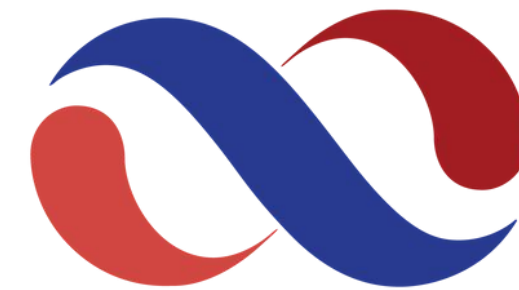

Safe, efficient and non-disruptive removal of old linings, coatings, waterproofing membranes, rubber or chemical build up. With the use of 3D technology, no personnel enters the workspace, ensuring safety and quality every time.

## Coatings

Protect your equipment from harsh chemicals and environmental conditions with specialized coatings. Available in a variety of chemical compounds and characteristics. Applied in a manner that meets your needs. These coatings protect your assets from corrosion and abrasions

## Rubber Linings

From small repairs, to full rubber re-lines, our rubber linings protect pipes, tanks and equipment against corrosion and abrasion. Available in a variety of compounds and characteristics, our engineers will ensure your asset can withstand exposure to the harshest materials.
